

## Die Ausbildungsphilosophie von Swiss Cave Diving

- *Hohe Ausbildungsqualität von Ausbildner und Kursteilnehmer*
- *Kein stures Systemdenken, sondern Vermittlung von „best practices“*
- *Pragmatische Anwendung von sicheren Tauchtechniken*
- *Respekt vor der Natur im Allgemeinen und dem Höhlenumfeld im Speziellen*
- *Verantwortungsvolles Auftreten in der Öffentlichkeit (10 Punkte Etikette)*

## Eine weitere Ausbildungsphilosophie, der wir uns anschliessen.....

(outspoken by  
Bil Philips,  
NSS-CDS)

Many accomplished technical divers, *employing a variety of sound techniques and equipment configurations*, have been successful over the years. The common threads amongst these techniques and configurations are simplicity, streamlining, and proven effectiveness.

My approach involves presenting *varying points of view* in an unbiased fashion, *regardless of where they originate. I see students as intelligent adults, capable of weighing the advantages and disadvantages of various viewpoints. Your ultimate responsibility is to yourself and your dive partners.*

Finally, the achievement of cave diver certification is not an end. Rather, it is just the beginning. It is imperative that students carry with them the wisdom to respect the environment, their own abilities and personal limits. This is the foundation of the training that I hope to provide to you. I highly encourage you to keep an open mind and make learning an ongoing and never ending process.

After all, experience is the best instructor you will ever have.

Sincerely,
